

REITOX Facility Locator_AUSTRIA

General Information: According to the Narcotic Substance Act (SMG) foreigners can legally take their prescribed OST-medication with them for up to 30 days. As soon as the OST-medication is used up, the treatment can be continued in Austria. The following list provides an overview on facilities per region, which potentially can be contacted. It is advisable to contact the facility in advance in order to arrange appointments and modalities in good time. It is also recommendable for those EU citizens in OST who are employed in Austria to organise the following in advance:
 + clarify the financing modalities with your own health insurance company and
 + a corresponding doctor's letter with substance, dose, modalities of dispensing, diagnoses, medically relevant information, etc. (an extended narcotic prescription) to take to Austria.
 Theoretically, OST is also possible with a General Practitioner with a specific authorization. In this case the cost coverage needs to be clarified in advance.

Province	City	Name of Institution	E-Mail	Phone	Website	Address
Burgenland	no info available
